## Headset Sena 30K Bluetooth Mesh-Net-work system

Sena's adaptive mesh networking technology for the 30K ensures seamless communication within your group, even if one driver moves out of range. With its additional connections and mesh networking technology, the 30K offers next generation communication. Simply press the button on top of the 30K to turn on public mode, and you will be automatically and instantaneously connected to a virtually limitless amount of 30K users within a mile range. Intercom connections are also now more stable than ever with Sena's new Mesh Intercom™ technology. When one of a group's riders goes out of range, the rest of the group remains seamlessly connected while the 30K still intelligently searches for the lost connection and reconnects automatically once back in range. No longer will you have to worry about losing half of your group due to a Bluetooth chain linked connection of the past. With private mode you can invite and communicate with up to 16 riders at a range of up to 2.0 km (1.2 miles), while an endless amount of Guests can join to listen in as well. When riding with 5 or more riders, the Mesh Intercom will intelligently keep the group connected at a range of up to 8 km (5 miles).

### HIGHLIGHTS

- Connection from rider to rider, up to a distance of 2000 metres in open terrain
- Group intercom for up to 16 users

## Headset Sena 20S EVO Bluetooth system

The SENA 20S EVO is the latest in high-end stereo Bluetooth headsets for motorcyclists. Suitable for use in any helmet, it offers an increased intercom distance and voice prompts for all key functions - including speed-dial for up to three favourites saved in the headset. The Universal Intercom protocol allows it to communicate with headsets by other manufacturers. Further enhanced HD audio sound quality keeps the rider in touch with up to nine riding companions and even offers group intercom. An integrated FM Radio with RDS can pre-set ten stations, adding to the joys of the journey, while Music Sharing allows riders to share music and navigation instructions wirelessly via Bluetooth with companions or a passenger.

### HIGHLIGHTS

- Connection from rider to rider, up to a distance of 2400 metres. Increases depending on the number of participants.
- Group intercom for up to eight users
- Nine-way intercom
- Bluetooth 4.1 works with all smartphones, mobi-

les and sat navs

- Up to 12 hours of talk time and 9 days of stand-by time
- Hands-free calls for all Bluetooth mobiles, smartphones and iPhone
- FM and VHF radio receiver with RDS AF (Radio Data System Alternate Frequencies)
- Updatable software

### GENERAL SPECS

#### Dimensions:

- Main module: 94.7 mm x 48.3 mm x 25.5 mm (3.7 in x 1.9 in x 1.0 in)
  - Speaker: driver unit 36 mm - thickness 6.5 mm
  - Boom microphone: length 190 mm
  - Wire between speakers: length 555 mm
- Weight: 60 g (2.11 oz)

### Headset Sena 10C Bluetooth communication system with integrated Actioncam

The Sena 10C is the first Bluetooth communication system worldwide that integrates an Action HD camera in a compact device. It allows speaking with up to four participants over a maximal distance of 2 kilometres. While filming, the camera is able to take the headset conversation as well as the sounds of the environment or music, so that you don't necessarily have to add music to the video afterwards. In standby mode, it's even possible to film later the last 60 seconds by pressing a button to save beautiful driving performance that would have been lost.

#### HIGHLIGHTS

- Connection from rider to rider, up to a distance of 2000 metres in open terrain
- Conference call with up to 4 participants
- Single connection with up to 4 participants
- Bluetooth 4.1 functioning with all smartphones, cellulars, GPS units,...
- Maximum operating life in use: 10 hours / in standby: 8 days
- Hands-free kit for all Bluetooth cellulars,

smartphones, iPhone

- VHF radio reception
- Updatable software
- ACTIONCAM:
  - Full HD Video resolution 1.080 p with up to 30 images/second
  - HD Video resolution 720 p with up to 60 images/second
  - Time lapse mode one image every 1/10 second
- PHOTO:
  - 3.5 megapixel sensor (3/2)
  - Image series with 10 images

#### GENERAL SPECS

- Dimensions:
  - Main module: 107 mm x 60 mm x 31 mm (4.2 in x 2.4 in x 1.2 in)
  - Speaker driver unit: 36 mm – thickness 6.5 mm
  - Boom microphone: length 190 mm
  - Wire between speakers: length 555 mm
- Weight:

### Handlebar remote RC4 for Sena Bluetooth communication

The RC4 offers complete control of your Sena Bluetooth Headset at the tip of your fingers, without the risk of removing your hands from the handlebars. Its glove friendly, 4-button design allows for extremely simple operation, and less distraction while riding. Place the device directly onto your bike's handlebars and you're ready to ride. The RC4 features a much more compact design than its predecessor, and fits perfectly on even more types and sizes of handlebars. You'll no longer have to reach to your helmet to intercom, answer calls or change a song again. The RC4 has a battery life of about 5 months.

The RC4 works with Bluetooth Smart Ready-enabled gear, which is part of the Bluetooth® 4.1 standard. Compatible Models: 20S, 10U, 10C, 10R and 10S.
