## ALLGEMEINE BETRIEBSERLAUBNIS (ABE)

nach § 22 in Verbindung mit § 20 Straßenverkehrs-Zulassungs-Ordnung (StVZO) in der Fassung der Bekanntmachung vom 26.04.2012 (BGBl I S.679)

Nummer der ABE: 91325\*03

Gerät: Lenkungsdämpfer

Typ: DS

Inhaber der ABE  
und Hersteller: Hyperpro Sales B.V.  
NL-4251 LR WERKENDAM

Für die oben bezeichneten reihenweise zu fertigenden oder gefertigten Geräte wird dieser Nachtrag mit folgender Maßgabe erteilt:

Die sich aus der Allgemeinen Betriebserlaubnis ergebenden Pflichten gelten sinngemäß auch für den Nachtrag.

In den bisherigen Genehmigungsunterlagen treten die aus diesem Nachtrag ersichtlichen Änderungen bzw. Ergänzungen ein.

# Kraftfahrt-Bundesamt

DE-24932 Flensburg

---

2

Nummer der ABE: 91325\*03

Die Lenkungsdämpfer, Typ DS, dürfen auch zum Anbau an die in den beiliegenden Prüfunterlagen aufgeführten Kraftfahrzeuge unter den angegebenen Bedingungen feilgeboten werden.

Im Übrigen gelten die im beiliegenden Nachtragsgutachten der GTÜ Gesellschaft für Technische Überwachung mbH, Stuttgart, vom 05.02.2015 festgehaltenen Angaben.

Flensburg, 26.02.2015

Im Auftrag

Jan Hendrik Schneider

Anlagen:

Nebenbestimmungen und Rechtsbehelfsbelehrung  
1 Nachtragsgutachten Nr. GTÜ StVZO22-14003.02

## Nebenbestimmungen und Rechtsbehelfsbelehrung

### Nebenbestimmungen

Die in der bisherigen Genehmigung enthaltenen Auflagen gelten auch für diesen Nachtrag.

### Rechtsbehelfsbelehrung

Gegen diese Genehmigung kann innerhalb eines Monats nach Bekanntgabe Widerspruch erhoben werden. Der Widerspruch ist beim **Kraftfahrt-Bundesamt, Fördestraße 16, 24944 Flensburg**, schriftlich oder zur Niederschrift einzulegen.

**zur Beantragung eines Nachtrags zur ABE Nr. KBA 91325\*02  
nach § 22 StVZO Austausch-Lenkungsdämpfer für Krafträder**

Fahrzeugteilart : Austausch-Lenkungsdämpfer für Krafträder  
Typ : DS  
Antragsteller : Hyper Pro Sales B.V., NL-4251 LR Werkendam

---

**1. Allgemeines**

- 1.1. Hersteller : Hyperpro Sales B.V.  
Hulsenboschstraat 26  
NL-4251 LR Werkendam  
Niederlande
- 1.2. Antragsteller : Siehe Ziff. 1.1.
- 1.3. Teileart : Austausch-Lenkungsdämpfer für Krafträder
- 1.4. Teiletyp / Handelsbezeichnung : DS
- 1.5. Varianten  
CSC : Lineare Dämpferkennlinie  
RSC : Progressive Dämpferkennlinie
- 1.6. Ausführungen : fahrzeugspezifische Abmessungen und  
Anbausätze  
Weitere Ausführungsmerkmale : siehe Anlage 1  
Codierung der Ausführungen : Beispiel: MK-DU07-T001
- 1.7. Grund des Nachtrags :  
- erweiterter Verwendungsbereich  
- redaktionelle Änderungen

- 2. Verwendungsbereich** : Verwendungsbereich und Anbauvorgaben  
siehe Anlage 1.

**3. Technische Angaben**

- 3.1. Beschreibung der Umrüstung : Lenkungsdämpfer, bestehend aus  
hydraulischem Schwingungsdämpfer und je-  
weils fahrzeugspezifischem Anbausatz.
- 3.2. Beschreibung der Bauteile : Siehe Anlage 2
- 3.3. Kennzeichnung : Herstellerlogo (Hyper Pro),  
KBA-Genehmigungsnummer,  
Code (FFFF) eingraviert
- Ort der Kennzeichnung : auf den Windungen

**zur Beantragung eines Nachtrags zur ABE Nr. KBA 91325\*02  
nach § 22 StVZO Austausch-Lenkungsdämpfer für Krafträder**

Fahrzeugteilart : Austausch-Lenkungsdämpfer für Krafträder  
Typ : DS  
Antragsteller : Hyper Pro Sales B.V., NL-4251 LR Werkendam

---

#### **4. Durchgeführte Prüfungen**

Die repräsentativen Versuchsfahrzeuge wurden einer eingehenden Begutachtung und Fahrerprobung unterzogen.

Prüfungen in Anlehnung an VdTÜV-MBL 762 " Prüfung von Zubehörfedern und Austauschfederbeinen für Kraftfahrzeuge nach §30a Abs.3 StVZO" (Stand 01/2011).

Anbauprüfungen wurden durchgeführt.

Die Betriebsfestigkeit wird durch beim Hersteller durchgeführte und dokumentierte, periodische Prüfstandsläufe für Lenkungsdämpfer und ihre Befestigungselemente geprüft.

Folgende Prüfungen wurden durchgeführt:

Stroking durability test, Überprüfung der Dämpferkennlinien über 10<sup>6</sup> Lastwechsel mit verschiedenen Hüben bei ca. 4 Hz bei mittlerer Einstellung für die Dämpferkraft und Druckstufe

Die Betriebsfestigkeit wurde außerdem durch Dauererprobung in Fahrversuchen gem. o.a. Prüfgrundlage geprüft und nachgewiesen. (Fahrstrecke: ca. 8000 km)

Bei unterschiedlichen Beladungszuständen der repräsentativen Versuchsfahrzeuge wurden bei maximaler, mittlerer und minimaler Dämpfereinstellung

- das Ansprechverhalten der Lenkungsdämpfer,
- das Lenk- und Bremsverhalten,
- das Fahrverhalten im Grenzbereich und auf schlechten Wegstrecken
- die Aussenkanten nach 97/24/EG, Kap.3

geprüft.

#### **5. Prüfergebnisse**

Eine ausreichende Betriebsfestigkeit der Teile wurde nachgewiesen.

Eine sichere Montage und ausreichende Freigängigkeit zu anderen Fahrzeugteilen ist bei sachgerechter Montage gewährleistet.

Die Teile werden nur an Originalbefestigungspunkten angebracht.

Fahr-, Lenk- und Bremsverhalten werden durch die Verwendung der Lenkungsdämpfer im Vergleich zum Serienzustand nicht negativ beeinflusst.

**zur Beantragung eines Nachtrags zur ABE Nr. KBA 91325\*02  
nach § 22 StVZO Austausch-Lenkungsdämpfer für Krafträder**

Fahrzeugteilart : Austausch-Lenkungsdämpfer für Krafträder  
Typ : DS  
Antragsteller : Hyper Pro Sales B.V., NL-4251 LR Werkendam

---

**6. Abnahme des Anbaus**

Die zur Prüfung vorgestellten Fahrzeugteile des Herstellers Hyper Pro Sales B.V. entsprechen den vorstehenden Angaben.

Die im Verwendungsbereich aufgeführten Fahrzeugtypen entsprechen nach dem Einbau der Fahrzeugteile den heute gültigen Vorschriften der StVZO sowie den hierzu vom Bundesminister für Verkehr erlassenen heute gültigen Anweisungen und Richtlinien.

Eine Prüfung des Einbaus der Fahrzeugteile und die Überprüfung der vorgeschlagenen Auflagen durch einen amtlich anerkannten Sachverständigen oder Prüfer für den Kfz-Verkehr oder einen Prüfsachverständigen einer Überwachungsorganisation wird bei eindeutiger Zuordnung des Fahrzeugs durch Nennung des Fahrzeugtyps **und** der Allgemeinen Betriebserlaubnis (ABE) bzw. EG-Typgenehmigung in Anlage 1 nicht für erforderlich gehalten.

Eine Änderung der Angaben in den Zulassungsbescheinigungen bzw. Fahrzeugpapieren wird nicht für erforderlich gehalten.

**7. Anlagen**

	<u>Stand</u>
1 Verwendungsbereich (16 Blatt)	05.02.2015
2 Beschreibung der Bauteile und beispielhafte Montageanleitungen (7 Seiten)	21.04.2014

**8. Schlussbestätigung**

Es lag beim Grundgutachten das Gutachten Nr.114KA0023-00 vom 08.03.2012 des Technischen Dienstes der TÜV Rheinland Kraftfahrt GmbH einschließlich der Genehmigung 91325 des KBA vor.

Die von der GTÜ an repräsentativen Fahrzeugen durchgeführten Prüfungen schließen auch den Verwendungsbereich des vorangegangenen Gutachtens mit ein.

Dieser Prüfbericht behandelt zusammenfassend und vollständig den Gesamtumfang der Typprüfung einschließlich der Dokumentation des Fahrzeugteils.

## STEERING DAMPER MOUNTING KIT

for

**APRILIA RSV1000 MILLE**

**Model 1998 - 2000<**

### MK-AP10-0001 INSTALLATION INSTRUCTIONS

#### In general:

HYPHERPRO can not be held responsible in any way for any form of physical, material, financial or other damage arising from use, assembly or overhaul of HYPHERPRO products. HYPHERPRO reserves the right to make changes without prior notice.

This product is ONLY TO BE INSTALLED BY A PROFESSIONAL MECHANIC.

This product is only to be used for the motorcycle brand, model and year stated specifically on top of the pages of this manual.

DO NOT attempt to install this product on motorcycles from any different brand, model and/or year than stated on the pages of this manual.

DO NOT use this kit for cars, boats, jet-skis, snowmobiles, ATVs, aircraft, hovercrafts or any other vehical and/or purpose.

HYPHERPRO steering dampers are FOR RACE USE ONLY, NOT FOR HIGHWAY USE!

#### Before installation:

- Please read the entire manual carefully before starting the installation!
- Check if you have all the tools required. Good tools are a must!
- Protect your bike at the most important places in and around the work area (e.g. tank, faying, frame, etc.), with a blanket, towel or similar.

#### During installation:

- Check all operations and parts carefully before, during and after performing each step.
- Clean all surfaces that are required for fitting parts together or for applying self adhesives or loctite, thoroughly with contactcleaner or another degreaser, unless otherwise stated.
- Be careful not to damage or scratch any part of your bike.
- ALWAYS work relaxed and concentrated! It is very easy to damage something or make a mistake.

#### After installation:

- Check and make sure that there is no contact between any part of the steering damper kit and any part of the motorcycle. The kit should not hit anything. Steering movement should not be limited by the steering damper. If the steering movement is limited, adjust the position of the tube in the clamp until steering movement is normal again. Do not forget to tighten the clamp bolt again!
- ALWAYS check the steering movement and feeling before each ride!
- FIRST RIDES: Start with the damper turned fully open (turn adjuster knob fully counter clockwise). Start adjusting in between rides with steps of MAX. 2 CLICKS (0.25 TURN) EACH TIME, until the damper is working satisfactory for your riding style.
- NEVER USE MAXIMUM SETTING, ALWAYS OPEN AT LEAST 2 CLICKS (0.25 TURN).

- WARNING ! DAMPER HAS AN ACTIVE / SPEEDSENSITIVE DAMPING SYSTEM;

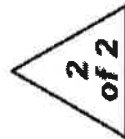

- Steering with NORMAL MOVEMENT should be FREE !!

- Steering with FAST MOVEMENT should be CONTROLLED BY DAMPER !!

- HYPHERPRO uses a special seal to reduce friction. The seal uses an oil film to work properly.

It is normal that some oil can appear on the pistonrod.

- Damper works with oil. DAMPING CAN BE HARDER AT LOWER TEMPERATURES!

**See [WWW.HYPHERPRO.COM](http://WWW.HYPHERPRO.COM) for the latest pictures, modifications, specs. and e-drawings of this steering damper kit.**

## Montageanleitung Lenkungsdämpfer quer vor der Gabelbrücke

### Step 1: Remove original steering damper

### Step 2: Damper & clamp pre-assembly

Pre-assemble the clamps onto the damper using:

- Steering damper (1)
- Bolt M8x35 Button head (2)
- 1x O-Ring (3)
- Spacer Type 1 (4)
- Fork clamp Part 1 (5)

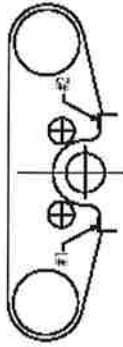

Disassemble the fork clamp. Fit clamp part 1 (5) to the balljoint of the steering damper (1a) using the M8x35 bolt (2), O-Ring (3) and spacer type 1 (4). Make sure it is assembled according to the pictures on page 1. Next tighten the bolt with a torque of approx. 14-17Nm/124-150Lbs.In/10.3-12.5Lbs.Ft.

### Step 3: Installing the steering lock limiters

Install the lock limiters using:

- Rubber 2mm steering lock limiters (self-adhesive)

Clean and degrease the left and right steering lock surfaces on the bottom of the steering head (see illustration). Stick the bumpers on the cleaned surfaces, so that the max steering angle will be limited by a few millimeters.

### Step 4: replacing the original damper

- Damper pre-assembly (from Step 2)
- Tube adapter for RSV Mille (6)

Remove the black plastic cover from the bottom of the lower triple tree, providing access to the bottom of the cockpit/frame. Loosen and remove the brake hose clamp from the front of the lower triple tree for better access.

Loosen clamp bolt (7), remove the standard clippings (8) (do not throw away!) and remove the M6 at the original damper ball joint. Mount tube adapter (6) in standard clamp (9) with opening in the same position and reposition the standard clippings (8). Do not tighten the clamp bolt (7) of the damper clamp (9) yet to install the damper to the front fairing subframe. Make sure it is assembled according to the pictures on page 1. Position the clamp at distance "X" (=59mm) and the damper body at the correct angle and tighten the clamp bolt with a torque of approximately 6Nm/53Lbs.In/4.4Lbs.Ft.

### Step 5: Installing the fork clamp

- Fork clamp Part 2 (10)
- 2x Bolt M5x35 (11)

Place the 2nd part of the fork clamp (10) on the fork leg, opposite to the 1st part (5). Fit the M5 bolts (11) and tighten them lightly and evenly. Check if the damper is level horizontally and tighten the bolts with a torque of approx. 8Nm/70Lbs.In/5.9Lbs.Ft.

Make sure that the damper has at least 2 mm clearance at full steering lock.

Check if the damper does not touch anything when steering from left to right. Check if the bike can make it's full steering angle from left to right, without being obstructed by the damper. If necessary re-position the clamp and re-tighten the bolts.

BAK-1207-3057-ACDhw - PN 2003

**Only fits when steering head  
is in original angle (24.5°)**

### MK-DU07-T001 INSTALLATION INSTRUCTIONS

#### In general:

HYPERRPRO can not be held responsible in any way for any form of physical, material, financial or other damage arising from use, assembly or overhaul of HYPERRPRO products. HYPERRPRO reserves the right to make changes without prior notice.

This product is ONLY TO BE INSTALLED BY A PROFESSIONAL MECHANIC. This product is only to be used for the motorcycle brand, model and year stated specifically on top of the pages of this manual. DO NOT attempt to install this product on motorcycles from any different brand, model and/or year than stated on the pages of this manual. DO NOT use this kit for cars, boats, jetskis, snowmobiles, ATVs, aircraft, hovercrafts or any other vehicles and/or purpose. HYPERRPRO steering dampers are FOR RACE USE ONLY, NOT FOR HIGHWAY USE!

#### Before installation:

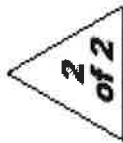

- Please read the entire manual carefully before starting the installation!
- Check if you have all the tools required. Good tools are a must!
- Protect your bike at the most important places it and around the work area (e.g. tank, faining, frame, etc.) with a blanket, towel or similar.

#### During installation:

- Check all operations and parts carefully before, during and after performing each step.
- Clean all surfaces that are required for fitting parts together or for applying seal adhesives or lockite, thoroughly with contact cleaner or another degreaser, unless otherwise stated.
- Be careful not to damage or scratch any part of your bike.
- ALWAYS work relaxed and concentrated! It is very easy to damage something or make a mistake.

#### After installation:

- Check and make sure that there is no contact between any part of the steering damper kit and any part of the motorcycle. The kit should not hit anything. Steering movement should not be limited by the steering damper. If the steering movement is limited, adjust the position of the tube in the clamp until steering movement is normal again. Do not forget to tighten the clamp bolt again!
- ALWAYS check the steering movement and feeling before each ride!
- FIRST RIDES: Start with the damper turned fully open (full adjuster knob fully counter clockwise). Start adjusting in between rides with steps of MAX. 2 CLICKS (0.25 TURN) EACH TIME, until the damper is working satisfactory for your riding style.
- NEVER USE MAXIMUM SETTING, ALWAYS OPEN AT LEAST 2 CLICKS (0.25 TURN).
- WARNING! DAMPER HAS AN ACTIVE / SPEED SENSITIVE DAMPING SYSTEM
- Steering with NORMAL MOVEMENT should be FREE !!
- Steering with FAST MOVEMENT should be CONTROLLED BY DAMPER !!
- HYPERRPRO uses a special seal to reduce friction. The seal uses an oil film to work properly. It is normal that some oil can appear on the piston rod.
- Damper works with oil: DAMPING CAN BE HARDER AT LOWER TEMPERATURES!

### Step 1: REMOVE THE ORIGINAL STEERING-DAMPER

### Step 2: Installing the tube clamp

- Bolt M6x20 low head (1)
- Tube Clamp Type 3 (2)
- O-Ring (3)
- Washer M6ø12 (4)

Put the assembly together as shown on page 1. Take the tube damp (2), use the bolt (1), O-ring (3), and the washers (4) to fit to the M6 hole in the top triple tree. Tighten the bolt with a torque of approx. 5-9 Nm/44-80 lbs. In/4.0-6.4 lbs. Ft.

### Step 3: installing the steering damper

- Steering damper (5)
- Bolt M6x25 buttonhead (6)
- O-ring (7)
- Spacer M6 to M8 (8)

Shove the damper (10), with the end knob-side first, through the clamp until the ball joint can be fitted to the frame mount. As shown on page 1: O-ring (7), spacer (8) and M6 bolt (6) to fix the ball joint to the frame and tighten with a torque of approx. 5-9 Nm/44-80 lbs. In/4.0-6.4 lbs. Ft. Position the damper tube so the bike can make its full steering angle without being obstructed by the steering damper, make sure that the damper has at least 2 mm clearance at full steering lock. Tighten the M6 clamp bolt (9) with a torque of approx. 6 Nm/53 lbs. In/4.4 lbs. Ft.

Check if the damper is level horizontally and aligned to the bike. Check if the damper does not touch anything (e.g. tank) when steering from left to right. Check if the bike can make its full steering angle from left to right and adjust if necessary.

See [WWW.HYPERRPRO.COM](http://WWW.HYPERRPRO.COM) for the latest pictures, modifications, specs. and drawings of this steering damper kit.
