

# Cafflano Klassic User's Manual

Congratulation!!! You can now enjoy the freshest and the tastiest coffee of your own with Cafflano Klassic.

---

## Product composition and characteristics

### **Drip Kettle & Cover** (Raw Material : polypropylene)

Cafflano(R) Klassic's cap has a uniquely designed diamond-shaped spout and it is used as a 'drip kettle' while brewing. For convenient measurement, it is materialized to store 270ml if water is filled up to just below the spout hole. With full capacity, you can brew coffee enough to serve for 2 people. Detachable cover can be used as a tumbler lid.

---

### **Hand-mill Grinder** (Raw Material : ceramic, stainless steel and polypropylene)

Ceramic burr-type hand-mill grinder guarantees consistent and durable performances, rust-free, and free of metallic odor. You can grind up to 30g of whole beans at a time, and weigh right amount with imprinted scales (10/15/20/25g). Its unique anti-bouncing design minimizes chances of beans bounced out of the grinder while grinding.

Stainless steel Handle is foldable for usability and portability. Depends on user's own taste, adjusting the coffee grind can be easily done by turning the Adjusting Wheel to the desired grind level.

---

### **Stainless Filter Dripper** (Raw Material : stainless steel and polypropylene)

Eco-friendly and permanent stainless steel is used for the filter. It is convenient when cleaning, keeping and brewing coffee. The Dripper has air vent that ensures smooth water and air flow while brewing, which results in the best taste coffee.

---

**Tumbler** (Raw Material : stainless steel, polypropylene and silicon)

Its stainless steel material makes it easy to clean, store and use. It can store up to 250ml from bottom to the bottom of the Filter Dripper. The whole tumbler can store up to maximum 450ml.

Silicon pad is attached to the bottom of the tumbler to prevent slipping.

---

### (How to use)

Please visit our website at [www.cafflano.com](http://www.cafflano.com) for detail product information and demo clips.

1. Put 15~20g of whole beans into the hand-mill grinder and start grinding slowly
  2. Remove the hand-mill grinder
  3. Start brewing with the drip kettle
  4. Remove the filter dripper
  5. Enjoy the fresh and tasty coffee!
  6. Use the cover as a tumbler lid.
-

## Adjusting the Coffee Grind

### Adjusting the Coffee Grind
